YS • INTERNAL REFERENCE

youShop — Intelligent Retail OS

WHAT IT IS

Cloud POS + inventory + loyalty + payments for retail merchants. Single platform from one-counter shops to multi-location chains, with youPay embedded.

BUILT FOR

Kirana / grocery, fashion, pharmacy, electronics, mobile shops, supermarkets, specialty retail, multi-brand chains, e-commerce-first retailers.

KEY USPS • WHY MERCHANTS CHOOSE THIS

Inventory-first

Barcode-driven stock that stays accurate across every outlet. Low-stock alerts, supplier management, central price push.

Loyalty built-in

Points, rewards, tiers and milestone campaigns without a separate CRM tool. One-time buyers become regulars.

Unified commerce

In-store, web, social and marketplaces in one inventory, one view. Channel breadth scales with tier.

youPay embedded

Cards, wallets, QR, split pay, gift cards — no separate payment integration. Auto-reconciliation across every tender.

REP PITCH NOTES • USE IN MERCHANT CONVERSATIONS

Lead with the inventory pain

Retail merchants live or die on stock accuracy. Standard opener: "Whatever you're using for billing — does it talk to your stock, your customers, and your accountant?" The honest answer is always no.

Anchor the channel growth path

Single-outlet today, multi-store tomorrow, online next year, franchise after that. youShop is the only platform that scales through all four without replatforming.

Reach for the add-on attach early

youMarketing converts retail merchants fastest in the first 90 days. Mention WhatsApp campaigns when the merchant talks about repeat customers — it lands every time.

Hardware bundle pricing, software tier pricing, and full add-on price list: see page 1. **Full feature scope per tier:** see Feature Matrix (Annex 05). **Add-on capability detail:** see Brochure (Annex 02).

YR • INTERNAL REFERENCE

youResto — Restaurant Management OS

WHAT IT IS

Front-of-house + kitchen + delivery aggregators + payments + accounting in one platform built for F&B operations, with youPay embedded and aggregator settlement reconciliation native.

BUILT FOR

Dine-in restaurants, QSRs, cafes, cloud / ghost kitchens, food courts, hotel F&B, catering, bars and pubs, multi-brand restaurant groups and franchises.

KEY USPS • WHY MERCHANTS CHOOSE THIS

Kitchen-aware

KDS, prep timers, recipe stock deduction, 86-sync from FOH to kitchen, course firing. Built for the rush.

Aggregators unified

Local in-country delivery platforms in one menu, one click to push. Commission impact visible per platform in real time.

Direct orders

Branded delivery app + ordering via website / Facebook / Instagram / WhatsApp. Save the commission, keep the guest.

F&B accounting

Aggregator settlement reconciliation built in — critical and unique to F&B. Auto-ledger from Standard, full youAccounts at Power.

REP PITCH NOTES • USE IN MERCHANT CONVERSATIONS

Lead with the aggregator commission pain

Every F&B operator has the same wound: 25–30% of revenue going to aggregators they can't reconcile. Opener: "How much did the aggregators take last month, and does that match what they paid you?" Almost no one knows cold.

Anchor the direct-orders growth path

Branded delivery app + social ordering = commission-free revenue. Frame: "save the commission, keep the guest" not "build an app."

youAccounts is the Power lever

Aggregator settlement reconciliation alone justifies Power. Frame: "Your accountant will save a week per month." Most merchants will move Standard → Power for this single capability.

Hardware bundle pricing, software tier pricing, and full add-on price list: see page 1. **Full feature scope per tier:** see Feature Matrix (Annex 05). **Add-on capability detail:** see Brochure (Annex 02).
